Petrolina, PE -Brasil

PROFESSIONAL PROFILE

Product Designer with over 5 years of experience in B2B and B2C products, specializing in transforming complex challenges into user-centered solutions. With a background in Psychology, I apply a deep understanding of human behavior, leveraging Artificial Intelligence (AI) to enhance insight generation, optimize processes, and create more personalized and efficient product experiences. My expertise includes leading end-to-end product cycles, from discovery to delivery, with a strong focus on building products that deliver real, measurable value for both users and the business.

PROFESSIONAL EXPERIENCE

Loomi

Product Designer

Jun 2024 - Presente

I work as a Product Designer across multiple projects for large clients such as Neoenergia, Vivo, IT Forum, and Atvos, leading end-to-end product cycles from discovery to delivery. I specialize in transforming loosely defined business problems into robust solutions for both desktop and mobile platforms, collaborating closely with clients, product teams, engineers, and fellow designers.

- **Structured Discovery Leadership:** I lead structured discovery processes, aligning context, goals, and priorities with stakeholders, resulting in the identification of market opportunities and product requirements that guide the roadmap.
- **Process Mapping & Optimization:** I map processes, user journeys, and flows, applying UX best practices to improve operational efficiency and enhance user satisfaction.
- **Solution Design & Validation:** I design and validate user flows, wireframes, and high-fidelity prototypes, supported by benchmarks, market analysis, and usability testing, ensuring effective and well-received solutions.
- **Strategic Deliverables:** I create and present strategic deliverables that support product decision-making and drive solution evolution, accelerating the development cycle.

Atvos Impact

Conducted over 30 interviews to map processes and prioritize automation opportunities, focusing on automated document analysis, AI-driven inconsistency detection, and automated email workflows.

📉 Significant reduction in operational time spent on document analysis, spreadsheet validation, and cross-team communication.

📈 Increased reliability and consistency of analyzed data through automated validations, comparisons, and structured feedback for the accounting team.

Sysvale SoftGroup

UX/UI Designer

Setembro 2021 - Jun 2024

I designed digital products for both public and private healthcare sectors, focusing on creating efficient, intuitive, and user-centered interfaces that address the specific needs of the industry.

Key responsibilities and outcomes:

- **End-to-End Product Design:** Worked across the full product cycle, from discovery to final delivery, supporting implementation and ensuring the consistent application of design standards and best practices.
- **Product Monitoring with FullStory:** Monitored live products to gather valuable insights into user behavior and experience. These insights were used to identify improvement opportunities and enhance interface usability, resulting in a more efficient user experience.
- **Custom Illustrations:** Created tailored illustrations, adding both visual and functional value to the projects.
- **Design System:** Contributed to the creation and expansion of components within the Design System, ensuring consistency and scalability across interfaces.
- **UX Writing:** Developed clear, concise, and user-focused content for interfaces, improving communication and overall user experience.
- **Heuristic Evaluation:** Conducted heuristic evaluations of interfaces designed by other designers, identifying and resolving usability issues to improve the quality and effectiveness of the solutions.
- **Usability Testing:** Led usability tests with real users to gather feedback, identify friction points, and validate design solutions, ensuring the final product met user expectations.

EDUCATION

Bachelor's Degree in Psychology

2018-2022

Maurício de Nassau University
